

Lecture

- An introduction to the world of resin based materials, development of the material and basic chemistry.
- Fundamentals of enamel and dentin bonding materials – the bonding mechanism, the hybrid layer, enamel and dentin bonding, the various generations and systems.
- Applications and limitations of composites and bonding agents and their clinical applications.
- Clinical considerations for CI I, CI II and CI III and CI V restorations with the use of composite resin based materials.
- Matching colors and creating characterizations in composite restorations
- Armamentarium required for direct composite restorations – a run through.
- Available materials – a wish list and comparisons – flowable, regular, condensable, fluoride releasing, fibre reinforced.

Hands on Sessions

- A Live demonstration of a direct CI II restoration done with composite resin material under isolation with polishing and finishing using the Profin system.
- Hands on practice on posterior extracted teeth to match colors, shades and create characterizations on composite restorations

“BASICS OF BONDING”

A four day comprehensive program

Dr. Mona Kakar

Rs 25,000/-

Charges include a working model, all materials, instruments and lunch, tea and coffee on all days

Ecole Dentale

An initiative from BITEIN
